-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1775

1. Claims 66,68-73,75-94,96-106 are of this application conflict with claims 1-39 of Application No. 10/279,959. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 73,75-80, 82,84-87, 89-94, 96, 98-104106 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishibayashi (6,270,848).

Nishibayashi et al discloses the claimed copper carbon composite having the claimed components therein (column 6, line 15).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1775

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 66,68-73,75-94,96-106 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobe Steel (JP 62-207832) in view of Ishikawa et al (6,110,577).

Kobe Steel discloses the known use of an additive of p and/or Mg in a copper carbon composite. In table 2, Fe, Zr and Sn are also shown.

These components are shown in Ishikawa et al to be functionally equivalent materials to those claimed to improve a copper composite.

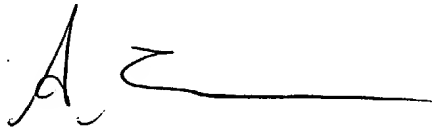

Thus it would have been obvious to one of ordinary skill in the art to use the claimed components in a copper carbon composite as these components are known in the composite art to improve performance of copper composites as shown by Ishikawa et al.
